

### ***Stream Stewardship Discussion***

A guide for discussion after a stream visit, a teaching tool for IP-73 *Living Along a Kentucky Stream*

- 1) What stream components could you identify at the stream visit?
  
  
  
  
  
  
  
  
  
  
  
- 2) Describe the vegetation near and along the stream. Could you identify the plants? Was there adequate cover to protect the stream banks? Why or why not?
  
  
  
  
  
  
  
  
  
  
  
- 3) Did you notice trash or other waste in or near the stream? Where did it come from? How could it be prevented? What can YOU as a citizen do to take action?
  
  
  
  
  
  
  
  
  
  
  
- 4) What programs are available to help landowners be good stream stewards? Choose one program or agency and investigate its resources.
